At first was a bit hesitant about the game as it's more complex than it's predecessor "Eurofishing", but once you get into it, which took me about 20 mins, it's a lot more fun, and actually quite simple too. The variety of maps and fish is brilliant, and it's a nice chilled out game... until your line snaps ! Definitely recommend this, lots of fun either by yourself or with friends.. This was recommended to me by a friend and immediately became one of my favourite games ever. Probably has the best worldbuilding I've ever seen in a game, paired with an amazing soundtrack and a distinct, beautiful art style, both of which help shape the atmosphere of the game. 10V10, would absolutely recommend.. Bought while 50% off (Unlimited) It's worth every penny of the \$10, so much fun can be had, even with randoms once you explain the game. This is like a mixture of cards against humanity and story wars, more or less the perfect mix, I can't recommend it enough.. The servers are objectively great. 128 tick, low ping and almost no loss and variance.

The community, on the other hand, is the most toxic I've ever seen. Now don't get me wrong, I know I can tilt and be toxic, but I definitely do not do that unless someone's provoked me. I almost always carry, and when I don't, I am a support player that gets traded or sets up his teammates for success. Yet in around 40-50% of games I get people who are toxic or just plain trolling, and when I get triggered I block them. Sometimes, like what happened in my last game however, I don't do that early enough and end up saying some stupid and I get banned but they don't. It's just like when you see a kid getting hit and he hits back, yet only the one who hit back gets punished. WTF?

TLDR: Basically MM with fewer cheaters (even though there still are some) and more trolls. Oh and a weirder ranking system (I'm A- yet somehow I get queued with C-B players. TF?. There's a reason we left Gradius behind. It's a really faithful remake and is beautiful and crisp and etc. But why did you have to remake a game?

Was loving the game till I bought this.

Can't recommend, huge waste of money, more expensive for less stuff than the other DLC. honestly this should have been free. You get three units for four dollars. none of them stand out, they all have weak gear nothing special that the other units have. save the gunto (axe reskin)

the Japanese army or IJA are not worth playing or the cost, their weapons gear and factions are underpowered to the point of handie cap.

they have 0 at weapons, their tanks SUCK. their strongest only haveint 5,500 HP!?! a kick in the shins will blow it up.

the guns are recoil heaven with no upsides.

this should have been free Devs, what the heck were you thinking?!. Don't buy this game if you want to play co-op with a friend. Everything seems to work until you or a friend attempt to join a match. The lobby shows up in the list and you can click to join but nothing happens. Online play does not work.. Nice game!

Its only annoying that you can't save your progress when you die, but it's not that long game so I don't have anything to complain.. First impression was a bit confusing, but the core game is pretty brilliant and is great at bending your mind. Some UI and performance improvements would help the experience a lot, though it's still Early Access so hopefully future patches make it run a bit smoother (I'm on a 970 and it studders a bit at the moment)

for 6 bucks it's definitely worth it. I really like this game because it's not too hard but also not too easy. It's a typical run of the mill platformer yet has it's own unique goofball style that provides a twisted fun factor. \$1 bucket is definitely where this belongs.. Nice action and graphics. I enjoyed the game play and the selection of weapons. Thumbs up!
